# REMASTOP® ROSCADO

SHUTER CAP, QUICK SOLUTION FOR HOLES IN FORMWORKS

REMASTOP® is an innovative patented system to guarantee a total watertight in tubes and holes from the formworks or any construction in which holes need to be sealed.

HIGH QUALITY PRODUCT WITH A GUARANTEE FOR 50 YEARS, made with EPDM and galvanized steel, suitable for contact with drinkable water or other alimentary products.

## USES

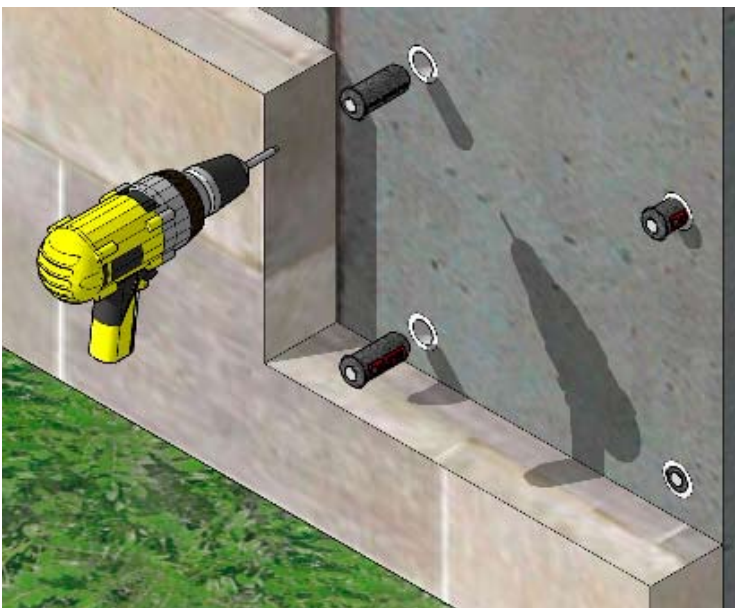

REMASTOP® is applied in holes from formworks to assure total watertight for a longtime, avoiding filtrations, leaks as a defect in sealing or a deterioration of the materials used previously. Also used to plugger or shutter temporarily any tube of water, heatings, etc.

## SURFACE PREPARATION

For its application it is only required an automatic or manual screwdriver or a spanner. It's recommended to clean the entrance of the hole to remove any remain of concrete, dust or sand to ensure a perfect contact between REMASTOP® with the walls of the hole and obtain a perfect watertight.

## INSTRUCTIONS FOR USE

Introduce the REMASTOP® in the hole and screw up till you get the necessary expansion to seal perfectly the hole. To be used as a rawl it is possible to change the original screw for a longer one to adjust perfectly REMASTOP® in the walls of the hole.

## COLOURS

Black, grey and white.

## CONSUMPTION

One unit per hole.

## PACKING AND STORING

REMASTOP<sup>®</sup> is presented in packages of 500, 1000 and 5000; with the necessary tools for its application.

## HYGIENE AND SAFETY

There are no specific precautions except those from the normal use of the tools.

<b>Specifications</b>	
Weight:	37,70 g
Length:	55 mm
Original diameter:	20,8 mm
Maxium expansion:	34,90 mm
Thread:	M6
Washer:	DIN 9021
Nut:	Selfnailing
Maximum resistance: pressaure:	7 Bar
